

Tsurumi Pump Marks Over 30 Year Affiliation with ARA at 2026 Show

**INTRODUCING TSURUMI
THREE-PHASE DEWATERING
PUMPS IN THE MARKET**

Tsurumi Pump will exhibit at the 2026 American Rental Association (ARA) show, taking place March 2-4 at the Orange County Convention Center in Orlando. With more than 10,000 attendees expected, the annual event unites rental professionals across North America.

Tsurumi will be located at booth 2446, where the company will highlight a range of submersible and engine driven pumps for rental applications. Tsurumi's HS submersible pump display and LSC puddle sucker pump will be highlighted by the company; both displays were designed to demonstrate real-world performance. Additional equipment that will be at the booth includes the KTV and KTZ heavy-duty submersible pumps, along with the LH high head series.

Representatives from Tsurumi's inside sales team, regional sales managers, and Canadian partners will be on site to connect with attendees and discuss rental specific solutions. The company brings over 30 years of continued

involvement with the American Rental Association, reinforcing its long-standing commitment to supporting the rental industry.

As part of its ARA presence, Tsurumi plans to offer a tiered promotional raffle package. Raffle items will range from branded swag and giveaways, to submersible pump packages featuring the HS and LB Series, engine pump packages with TE and EPT units, low level LSC and LSR pumps, and a TPG generator.

Tsurumi's participation at the ARA show highlights its commitment to the rental equipment industry. The company continues to be a trusted partner for rental centers supporting residential, commercial, industrial, and construction dewatering applications.

Attendees are encouraged to visit booth 2446 to learn more about Tsurumi's rental pumping solutions and speak directly with the team.
