Tsurumi Pump will exhibit at CONEXPO-CON/AGG, taking place March 3-7, 2026 at the Las Vegas Convention Center. Attendees can find Tsurumi in the Central Hall at booth C20706, where the company will be highlighting submersible pumps solutions for construction and mining job sites.

As a global leader in the submersible pump industry, Tsurumi is a partner in dewatering job sites around the world. With operations in more than 22 countries, Tsurumi's pumps are trusted for applications ranging from deep tunnelling and quarry dewatering to large-scale mining operations. Tsurumi's heavy-duty three phase models are engineered to reliably move high volumes of water with abrasive solids.

At CONEXPO-CON/AGG, Tsurumi will feature a range of cutaway pump displays, designed to offer attendees a closer look at internal design features that distinguish

Tsurumi as a leader in the construction industry.

Tsurumi will also be revealing a brand-new booth design, featuring contemporary graphics and an open concept layout. The new booth design provides attendees with the opportunity to connect with Tsurumi team members while getting a close-up look at products.

The booth will showcase a broad lineup of pumps including the GSZ for high volume dewatering, cast iron KRS Series, KTZ for heavy duty drainage, and LH for dewatering construction and mining sites. Corrosion resistant models such as the SFQ and SQ Series will also be on display, along with other slurry and drainage solutions.

Many of the pumps featured at the booth are equipped with shaft mount agitators, designed to keep solids suspended, making them well suited for pumping fluid containing sand and slurry. Tsurumi will also highlight corrosion

Tsurumi brings high-performance dewatering solutions to CONEXPO-CON/AGG, highlighting pumps built for demanding construction and mining sites.

resistant materials that help to extend pump life in abrasive environments commonly found on construction and mining sites.

“Shows like CONEXPO-CON/AGG allow us to stay closely aligned with the needs of the construction and mining industries,” stated Joe Ranieri, Midwest Regional Manager at Tsurumi Pump. “This show helps drive conversations that allow us to better understand how job site conditions are evolving and how Tsurumi can continue to meet those demands,” Ranieri added.

ABOUT TSURUMI

Tsurumi (America), Inc., a division of Tsurumi Manufacturing, was founded in 1979. Headquartered in Glendale Heights, Illinois, Tsurumi (America), Inc. has bases in Quebec, Canada; El Paso, Texas; and Salt Lake City. Globally, Tsurumi is active in 45 countries and has been an innovator in the pump industry since 1924. Tsurumi (America) is a provider of leading pumping technology in construction, civil engineering, mining, industrial wastewater, municipal wastewater, sewage treatment, flood control and scenery creation fields. Tsurumi products are backed by independent, third-party verification. Beyond leading pump technology, Tsurumi (America) is recognized for its robust distribution network and one of the largest on-hand inventories in North America.
