

# Tsurumi Pump to Showcase Dewatering Solutions at World of Concrete

Tsurumi Pump will return to the Las Vegas Convention Center for World of Concrete show, highlighting a wide range of portable and construction ready pumps. Attendees can find the Tsurumi team in booth N2862, where several of the company's top construction products will be on display including:

- **LB semi-vortex slimline pump**
- **HS high-performance, single-phase submersible pump**
- **NK heavy duty manual electric pump**
- **LSC puddle sucker**
- **EPT trash pump**
- **LSR low level dewatering pump**
- **TE engine driven centrifugal pump**

The product lineup represents the breadth of Tsurumi's portable and construction pump offerings, from lightweight models suited for quick, on-the-go dewatering to heavy-duty options built for continuous operation. Tsurumi's products focus on long-service lifespan, ease of maintenance, and proven performance.

World of Concrete remains the largest annual international gathering of commercial concrete and masonry construction professionals from all over the world. For Tsurumi, the event offers the opportunity to connect with people who depend on dewatering equipment for their projects.

"Our team looks forward to this show every year because it reinforces our commitment to the construction industry," stated Sheri Menzel, Portable Products & Rental Market Manager at Tsurumi. "Our products were engineered with reliability in mind, which is why they've become trusted on so many jobsites," Menzel added.

## ABOUT TSURUMI

Tsurumi (America), Inc., a division of Tsurumi Manufacturing, was founded in 1979. Headquartered in Glendale Heights, Illinois, Tsurumi (America), Inc. has bases in Quebec, Canada; El Paso, Texas; and Salt Lake City. Globally, Tsurumi is active in 45 countries and has been an innovator in the pump industry since 1924. Tsurumi (America) is a provider of leading pumping technology in construction, civil engineering, mining, industrial wastewater, municipal wastewater, sewage treatment, flood control and scenery creation fields. Tsurumi products are backed by independent, third-party verification. Beyond leading pump technology, Tsurumi (America) is recognized for its robust distribution network and one of the largest on-hand inventories in North America.
