Tsurumi (America), Inc. will highlight its growing portfolio of municipal wastewater solutions at WEFTEC 2026, featuring the North American launch of the new BN Series smashing cutter pumps alongside its AVANT FM-approved product line, wastewater process equipment, and proven sewage and wastewater pumps. Visitors to Booth 4241 will have the opportunity to meet with Tsurumi's product specialists and explore solutions designed to improve reliability throughout wastewater collection and treatment systems.

Making its North American debut, the BN Series expands Tsurumi's wastewater offering with a rugged cutter pump engineered for municipal sewage applications where dependable solids handling and clog resistance are critical. The new series complements Tsurumi's established lineup by providing another reliable solution for today's

demanding wastewater environments.

Also on display will be the Tsurumi AVANT, FM-approved line of submersible pumps for hazardous-location wastewater applications. Available in wet-pit and dry-pit configurations with multiple hydraulic options, the AVANT family is designed to provide municipalities and engineers with flexible, code-compliant pumping solutions for a wide range of system requirements.

Beyond pumping, Tsurumi offers a complete line of wastewater process equipment, including mixers, aerators, bar screens, dehydrators, and related technologies that help improve treatment efficiency and support reliable plant operation. At WEFTEC, Tsurumi is also partnering with Esmil USA to highlight complementary wastewater

Engineered for reliable solids handling, combining advanced anti-clogging technology with rugged construction for municipal wastewater applications.

technologies and connect visitors between Tsurumi Booth 4241 and Esmil Booth 1501. Combined with Tsurumi’s extensive portfolio of sewage and wastewater pumps, these products provide solutions spanning collection systems, lift stations, and treatment facilities.

For more than a century, Tsurumi has earned a global reputation for manufacturing durable, dependable pumping equipment serving municipal, industrial, construction, mining, and water feature applications. WEFTEC attendees are invited to meet with Tsurumi’s wastewater experts to discuss application challenges and discover solutions tailored to their specific needs.

“WEFTEC is the ideal opportunity to demonstrate how Tsurumi continues to expand its municipal wastewater offering,” said Chris Bristol, CEO of Tsurumi (America), Inc. “From the introduction of the BN Series to our AVANT FM-approved pumps, wastewater process equipment, and proven sewage pump lineup, along with partnerships that bring complementary technologies together, we’re committed to providing customers with reliable, high-quality solutions backed by the engineering expertise and support they expect from Tsurumi.”
